Vujade Traits of Dave - KavÃP

Sensory

Kinesthetic

“I pick up what you’re doing better when I’m hands on!”

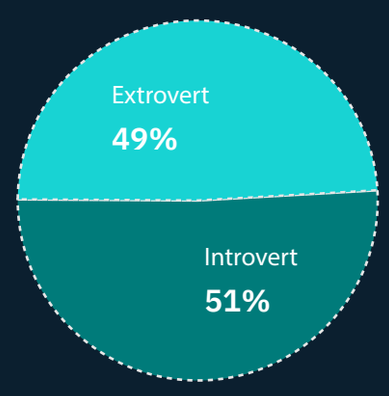

Primarily Kinesthetic - hands-on (touch and feel), with a conscious effort required for being both:

- Auditory - discussions (ask questions and listen), and
- Visual - take in information by using images (pictures, charts and graphs).

Temperament

Ambivert

“I appreciate time for reflection but also feed off the energy of others.”

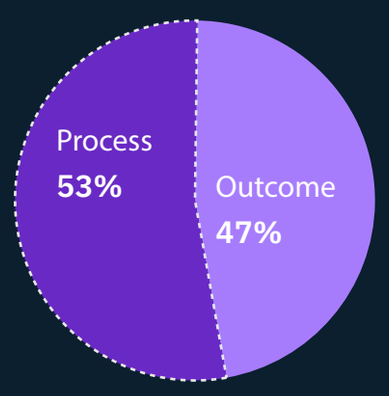

Ambiverted (Slightly Introverted) and appreciates:

- Personal reflection on situations or events,
- Reaching out to others,
- Personal tranquility, and
- External stimuli to some degree.

Cognitive

Process

“I really like to understand the ‘how’ when you talk about goals.”

Process (0.69P) who create:

- The plan.

How Dave’s hobbies align with his Sensory, Temperament and Cognitive:

- **Backpacking:** Working together to make it to our destination, I find that everyone understands each other more. There is nothing quite like the crucible of the wilderness.

- **Downhill Skiing:** I like following others or leading when I’m headed down the hill, but I also very much appreciate not worrying about others and focusing in on my own thoughts as I take in those mountaintop vistas!

- **Woodworking:** While I certainly understand how to visualize the result of what I’m building, figuring out the process of how I get there is brings me a lot of energy to get there.

*Above comments reflect primary preferences. Each individual has all preferences in different proportions; allowing for us to leverage those if needed in order to connect with others.
